MIPOLAM ESPRIT

- ▶ High performance homogeneous flooring suitable for heavy duty traffic, available in sheet format.
- ▶ **Group T** wear rating compliant (very high resistance to traffic).
- ▶ Innovative true non-directional design, available in 24 colour tones.
- ▶ Modern surface with a matt finish.
- ▶ Evercare™ surface treatment: no wax for life.
- ▶ 100% recyclable.

- ① evercare™ treatment
- ② Densely compacted surface

MIPOLAM ESPRIT is a vinyl flooring homogeneous **pressed** in 2m sheets, with a thickness of 2mm and a **weight ≤ 2780 g**. The non-directional design with colour throughout the thickness is available in 24 references presenting a nice **matt finish**. This flooring is suitable for heavy duty traffic areas, and facilitates floor-wall junctions, angles and welding treatments. The flooring is equipped with **Evercare™**, patented surface treatment obtained by **UV laser cross-linking** offering the best **chemical resistance to the main products used in healthcare** environment as Betadine, eosin, hydro alcoholic solutions, making the maintenance easy and long lasting the flooring. This treatment **avoids applying any acrylic emulsion** throughout the lifetime of the product.

It is composed of 45% minerals, 22% of inexhaustible material and at least **25% of recycled 100% controlled**. It is free of formaldehyde, heavy metals and CMR 1 & 2 or vPvB (very persistent and very bio accumulative) or PBT (persistent, bio-accumulative and toxic) and is **REACH compliant**. COV emissions after 28 days (ISO 16000-6) are below detection levels with $<10 \mu\text{g} / \text{m}^3$ and this product is classified A + (the best class).

On demand, MIPOLAM ESPRIT is available with phthalate free. The flooring is **antistatic** ($<2\text{kV}$), its residual indentation is $\leq 0.02 \text{ mm}$ to 150 minutes respecting EN 433.

The flooring complies with **EN 649 (34-43)** offering a **group T** wear rating suitable for heavy duty traffic areas and **B_{fl}-s1** fire resistance.

EVERCARE™ TECHNOLOGY

AN EXCLUSIVE PATENTED TECHNOLOGY BY GERFLOR

THE BEST CHEMICAL STAIN RESISTANCE SURFACE TREATMENT

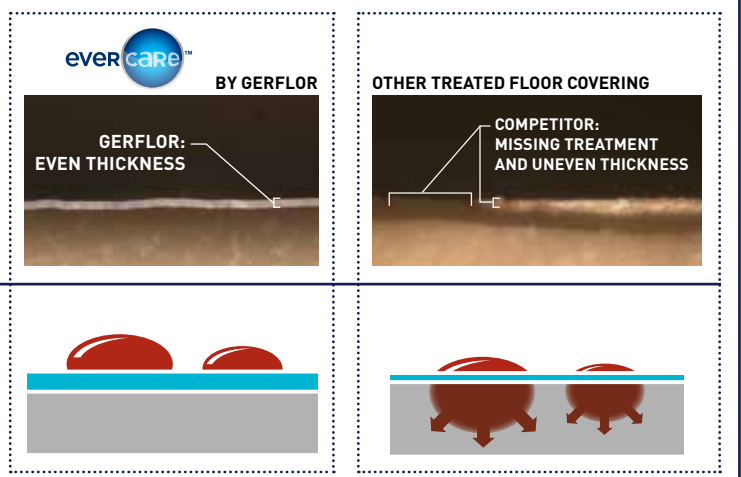

Highly Durable: Exclusive surface treatment applied by UV laser cross-linking provides superior durability and an even surface thickness, creating an impenetrable barrier against stains and chemicals found in healthcare.

Longer life expectancy.

100% non-porous surface:

The surface treatment creates a 100% non-porous barrier to all liquids and chemicals, keeping all stains floating on the surface.

Simple and easy stain removal.

* Products available in tiles for a minimum quantity order of 500 sqm - ** The implementation of an effective cleaning method is the best defence against infection

INSTALLATION

Laying is the responsibility of the installer. Installation should be made in accordance with installation guidelines supplied and regularly updated by Gerflor's Technical Department. Installation should be carried out in accordance with local standards. Subfloor to be smooth, hard, clean and dry prior to laying. Where applicable the subfloor must incorporate an effective Damp Proof Membrane. The material must be allowed to acclimatise 24 hours prior to installation in a room temperature of between 18-24°C. All seams must be heat welded using Gerflor matching weld rod.

MAINTENANCE

Maintenance should be carried out regularly to retain the appearance and durability of the floor. The floor covering should be maintained with regular sweeping and damp mopping using a neutral cleaner, or auto scrubber machine with an appropriate pad.

Rubber leaves indelible stains on vinyl floorings: do not use mats with rubber backing and replace tubular furniture feet with those made of PVC or polyamide. Place mats of sufficient length at entrances to reduce outside sources of dirt.

Further installation and maintenance instructions are available from Gerflor.

Committed to sustainable development
